LIFELONG RESEARCH OBJECTIVE

My lifelong research objective is to advance the development of machine translation systems that ensure consistent translation quality across diverse languages, thereby breaking down barriers to global communication. Through this research, I aim to contribute to creating an environment where linguistic diversity is honored, while enabling effective communication without cultural or linguistic impediments.

RESEARCH INTERESTS

My research philosophy is centered on service-driven research, aiming to bridge the gap between foundational theories in natural language processing (NLP) and their practical, real-world applications. My primary interests include the development of efficient, purpose-trained Large Language Models (LLMs), with a particular focus on their fundamental capabilities, rigorous evaluation, and addressing issues of recency and truthfulness. Additionally, I am deeply engaged in cross-lingual NLP and multidisciplinary research that integrates diverse fields to enhance NLP applications.
